Our affiliations and/or relationships with experts in the art market result in a more flexible borrowing procedure for our clients worldwide. With confidential service, global capabilities and competitive interest rates, our firm can offer services normally out of the reach of other law firms.

Using your fine and decorative art, jewelry or other fine valuables as collateral, we can help you establish a line of credit of up to 40% of the property's low estimated auction value. The minimum loan of this type is generally U.S. \$500,000.00 or the equivalent in another currency.

We can assist you with consignor loans, in obtaining a loan before the actual sale of the valuable.

We can also help you with a collection loan, where you obtain a loan and keep your valuables.

Whether you are refinancing a debt, expanding your collection, or embarking on a new business venture, we can help you obtain a business loan which conforms as close as possible to your financial needs and desires.

Our firm has access to an international standard for object description that has been adopted as standard by the art world, insurers and law enforcement officials.
